1 GAME BASICS

This is a property strategy board game for 2–4 players, played on one computer in local multiplayer mode. It uses classic UK Monopoly-style property economics as its foundation, but is presented with an entirely original visual identity, artwork, branding, tokens, cards, and UI.

Players	2 – 4
Mode	Local multiplayer (one computer)
Starting money	\$1,500 per player
Currency symbol	\$
Economic foundation	Classic UK Monopoly property values
Visual identity	100% original — name, art, tokens, cards, UI

Note: Vine Street is renamed to Food Street while keeping Vine Street's exact economics.

2 OBJECTIVE

The objective is to be the **last player remaining**. A player is eliminated when they become bankrupt and cannot meet their financial obligations.

3 THE BOARD

The board follows the classic UK property layout. All groups, stations, utilities, and special spaces are listed below.

Colour Group	Properties
Brown	Old Kent Road, Whitechapel Road
Light Blue	The Angel, Islington, Euston Road, Pentonville Road
Pink	Pall Mall, Whitehall, Northumberland Avenue
Orange	Bow Street, Marlborough Street, Food Street *
Red	Strand, Fleet Street, Trafalgar Square
Yellow	Leicester Square, Coventry Street, Piccadilly
Green	Regent Street, Oxford Street, Bond Street
Dark Blue	Park Lane, Mayfair
Stations (×4)	King's Cross • Marylebone • Fenchurch St • Liverpool St
Utilities (×2)	Electric Company • Water Works
Special Spaces	GO Jail/Just Visiting Free Parking Go To Jail Chance (×3) Community Chest (×3) Income

** Food Street replaces Vine Street. Economics are identical to Vine Street.*

4 GO

- Passing GO awards the player **+\$200**.
- Landing directly on GO also awards **+\$200**.

5 DICE RULES

The dice system is one of the game's major custom mechanics. Three distinct outcomes must be handled differently.

Normal Roll

The player moves by the total of the two dice and resolves the landing space normally.

Normal Doubles (any double except 6+6)

- Examples: 1+1, 2+2, 3+3, 4+4, 5+5.
- Move by the dice total.
- Resolve the landing space normally.
- **Turn ends**. The player does NOT receive another roll.

There is no three-doubles-to-jail rule.

Special 6+6 (Forced Reroll)

- Rolling 6+6 is completely different from all other doubles.
- The player does **NOT move**.
- The player does **NOT resolve** any landing.
- The player **must roll again** immediately.
- This chain can repeat indefinitely until a non-6+6 result is rolled.

Roll	Outcome
6+6	No movement — roll again
6+6	No movement — roll again
4+3 = 7	Move 7 spaces — resolve landing — turn ends

6 BUYING PROPERTIES & AUCTIONS

When a player lands on an **unowned purchasable property**:

- They may purchase it at the listed price.
- They may decline to purchase it.
- If they decline, the property simply remains unowned.

Auctions

There are no auctions. The game does not automatically auction a property when someone declines to buy it.

7 PROPERTY RENT

When a player lands on another player's property, they pay the applicable rent according to the following rules.

Normal Rent

Rent is determined by the number of houses or hotel on the property, using the printed values in the Property Economics table (Section 21).

Complete Colour Group Bonus (0 buildings)

- If the owner owns the **entire colour group** AND the property has **no houses and no hotel**:
- The base rent is multiplied by **2×**.
- Example: base rent \$10 → rent charged = **\$20**.

Important Exception

The 2× multiplier does **NOT apply** when the property has any buildings. Once a house or hotel is placed, the printed building rent is used exactly — no additional doubling.

Other Rent Rules

- Landing on your own property — nothing happens.
- Mortgaged property — rent = **\$0**.
- Rent is calculated dynamically at the moment the player lands.

8 BUILDING HOUSES

- A player must own the **complete colour group** before building.
- There is **no even-building restriction**. Houses may be placed unevenly across the group.
- A player may purchase **multiple houses** in one turn.
- The game uses an **effectively unlimited house supply** — no shortage mechanic.

Building Progression

Stage	Description
0	Unimproved
1 House	First house placed
2 Houses	Second house placed
3 Houses	Third house placed
4 Houses	Fourth house placed — hotel upgrade available
Hotel	Maximum improvement

9 HOTEL UPGRADES

- A property must have **4 houses** before a hotel can be built.
- The player pays the property's **house cost one additional time**.
- The 4 houses are removed and replaced by 1 hotel.
- The hotel upgrade cost equals the property's house cost.

Example: House cost = \$100. Player pays \$100 more. 4 houses → 1 hotel.

10 SELLING HOUSES & HOTELS

Houses

- Houses can be sold back to the Bank at any time.
- Houses sell for **100% of their original purchase price**.
- There is **no even-selling restriction**.

Hotels

- Hotels can be sold back to the Bank for **100% of the hotel purchase price**.
- Selling a hotel returns the property to **0 buildings** (the 4 constituent houses are NOT returned separately).

11 MORTGAGES

- Mortgage value is the property's listed mortgage value.
- A mortgaged property generates **\$0 rent**.

- A mortgaged property **cannot be traded**.
- A player may mortgage assets before bankruptcy to try to raise enough money to pay a debt.

12 TRADING

Trading is intentionally very flexible. Players can negotiate any combination of properties and money that both parties agree to.

Valid Trade Types

Trade Type	Notes
Property ↔ Property	Straight swap
Property ↔ Money	One-sided purchase
Money ↔ Property	One-sided purchase (reverse)
Money + Property ↔ Property	Mixed deal
Property + Property ↔ Property	Two properties for one (both parties must agree)

Timing

- Trades can happen during **any** player's turn.
- Trades can happen while a player is in jail.
- Trading is temporarily unavailable while the game is actively processing: dice movement, landing resolution, card resolution, payment, or building actions.

Trade Restrictions

- Only **unmortgaged** properties with **no buildings** can be traded.
- Properties with houses or hotels **cannot** be traded.

13 STATIONS

Stations Owned	Rent
1	\$25
2	\$50
3	\$100
4	\$200

- Purchase price: **\$200** per station.
- Mortgage value: **\$100** per station.
- Stations can be traded subject to normal trading restrictions.

14 UTILITIES

Utilities Owned	Rent Formula
1 (Electric Company or Water Works)	4 × dice total

2 (Both utilities)	10 × dice total
--------------------	-----------------

- The relevant dice total is the roll that caused the player to land on the utility.
- Example (1 utility): Dice = 4+3 = 7. Rent = 7 × 4 = **\$28**.
- Example (2 utilities): Dice = 4+3 = 7. Rent = 7 × 10 = **\$70**.
- Purchase price: **\$150** per utility. Mortgage value: **\$75**.

15 TAXES

Space	Amount	Destination
Income Tax	\$100	Pay to the Bank
Super Tax	\$200	Pay to the Bank

- Tax payments go directly to the Bank and **disappear from the game economy**.
- Tax money does **NOT** accumulate at Free Parking.

16 FREE PARKING

Landing on Free Parking: **nothing happens**.

- No jackpot. No accumulated money. No bonus of any kind.

17 CHANCE & COMMUNITY CHEST

- Both decks are **shuffled at the beginning** of the game.
- Landing on the space: draw the top card, display it, execute its effect, then return it to the **bottom** of the deck.
- **Get Out of Jail Free** cards are kept by the player and returned to the deck only when used. They can also be traded.
- Movement cards: move the player to the stated destination, then resolve that space normally (including rent if applicable).
- Jail cards: move the player to Jail immediately. Turn ends.

18 JAIL

A player enters Jail when they land on **Go To Jail** or a Chance/Community Chest card sends them there.

Exiting Jail

Option	Method	Notes
Option 1	Roll a normal double (any double except 6+6)	No payment required
Option 2	Pay \$50	Player is released and moves normally
Option 3	Use Get Out of Jail Free card	Card is returned to deck

6+6 While in Jail

The special 6+6 rule still applies while jailed. Rolling 6+6 in jail triggers a forced reroll — the player does not move and does not escape. Only a normal double (not 6+6) releases the player without payment.

Example: Jail → 6+6 → roll again → 4+4. Player escapes jail, moves 8, resolves landing, turn ends.

19 BANKRUPTCY

When a player owes money and cannot pay, they first have the opportunity to raise funds:

- Sell houses back to the Bank (100% value).
- Sell hotels back to the Bank (100% value).
- Mortgage eligible properties.

If the player still cannot meet their obligation, they are **bankrupt and eliminated**.

Custom Bankruptcy Rule — All Properties to the Bank

- **All** of the bankrupt player's properties transfer to the Bank.
- Mortgaged properties become **automatically unmortgaged**.
- All houses and hotels are removed.
- The creditor (the player who was owed money) receives **nothing** — no properties, no remaining assets.
- Properties return to unowned status and can be purchased normally when another player lands on them.
- There is no immediate shopping phase, automatic auction, or automatic transfer to the creditor.

20 WINNING THE GAME

The **last player remaining** wins the game. Players are eliminated through bankruptcy.

- An optional early End Game / Declare Winner mechanism may be added in a future version.

21 PROPERTY ECONOMICS

All values below are exactly locked and form the authoritative economic reference for the game.

Brown

Property	Buy	Mortgage	Base Rent	1H	2H	3H	4H	Hotel	House Cost
Old Kent Road	\$60	\$30	\$2	\$10	\$30	\$90	\$160	\$250	\$50

Mayfair	\$400	\$200	\$50	\$200	\$600	\$1,400	\$1,700	\$2,000	\$200

* Food Street replaces Vine Street; economics identical to original Vine Street.

Stations & Utilities

Name	Type	Buy	Mortgage	Rent
King's Cross Station	Station	\$200	\$100	See station rent table
Marylebone Station	Station	\$200	\$100	See station rent table
Fenchurch St Station	Station	\$200	\$100	See station rent table
Liverpool St Station	Station	\$200	\$100	See station rent table
Electric Company	Utility	\$150	\$75	4× or 10× dice total
Water Works	Utility	\$150	\$75	4× or 10× dice total

22 LOCKED RULES — MASTER REFERENCE

The following mechanics are non-negotiable implementation requirements. They represent the deliberate design decisions that differentiate this game from traditional Monopoly.

- ✓ 6+6 = forced reroll, no movement.
- ✓ Other doubles = normal movement, then turn ends (no extra roll).
- ✓ Complete colour set + no buildings = 2× rent.
- ✓ Buildings remove the 2× multiplier; printed building rent is used exactly.
- ✓ No auctions of any kind.
- ✓ No even-building restriction.
- ✓ Unlimited house supply — no shortage mechanic.
- ✓ 100% house resale value.
- ✓ 100% hotel resale value; selling hotel returns property to 0 buildings.
- ✓ Flexible trading, including 2-for-1 property trades.
- ✓ Utilities = 4× dice total (1 utility) / 10× dice total (both utilities).
- ✓ Stations = \$25 / \$50 / \$100 / \$200 based on quantity owned.
- ✓ Income Tax = \$100 / Super Tax = \$200; both disappear into the Bank.
- ✓ Free Parking = nothing happens.
- ✓ Bankruptcy sends all properties to the Bank, not the creditor.
- ✓ Mortgaged bankrupt properties automatically become unmortgaged.
- ✓ Food Street replaces Vine Street (identical economics).
- ✓ Original visual assets and identity throughout — no Monopoly branding.

This document is the authoritative rules reference. All values and mechanics listed here are final for Version 1.0.
